

Project Kage - User Experience Features

43. Personalized Dashboard

The central hub of the user experience, adapting to the user's goals, habits, and usage patterns:

- **Dynamic Layout:** Automatically reorganizes based on most important goals and upcoming habits
- **Morning/Evening Modes:** Different layouts optimized for start-of-day planning and end-of-day reflection
- **Priority Focus Areas:** Highlights current priority goals or habits needing attention
- **Progress Visualization:** Custom widgets showing progress toward various goals with appropriate visualization types
- **Upcoming Schedule:** Time-aware display of the next few scheduled habits or tasks
- **Streak Information:** Prominent display of current streaks and those at risk
- **Quick Access Buttons:** One-tap access to most-used features (journal, habit tracking, AI assistant)
- **Motivational Elements:** Personalized quotes, insights, or reminders based on history and preferences
- **Weather Integration:** Shows local weather that might impact outdoor habits or activities
- **Celebration Space:** Dedicated area highlighting recent achievements and milestones
- **AI Insights Widget:** Shows personalized tips and observations from the AI assistant
- **Quick Capture:** Allows rapid logging of thoughts, tasks, or habit completions without navigating away

44. Today View

Focused display of current day's commitments and opportunities:

- **Chronological Timeline:** Time-ordered view of today's habits and tasks
- **Completion Tracking:** Real-time status updates as items are finished
- **Priority Indicators:** Visual cues for most important items
- **Quick-completion Actions:** One-tap habit marking
- **Context Information:** Relevant details for each scheduled item
- **Time Block Visualization:** Visual representation of day's schedule
- **Progress Bar:** Overall completion percentage for the day
- **Flexible Sorting:** Arrange by time, priority, or category
- **Next Up Highlighting:** Prominent display of imminent activities
- **Schedule Adjustments:** Easy tools to modify day's plan

- **Daily Notes:** Capture thoughts specific to today
- **Day Summary:** End-of-day review and reflection opportunity

45. Progress Reports and Insights

Comprehensive analysis of advancement toward goals and habits:

- **Custom Date Ranges:** Select specific periods for analysis
- **Multiple Visualization Types:** Charts, graphs, calendars, and text summaries
- **Comparative Analysis:** Current versus previous periods
- **Goal Progress Tracking:** Percentage completion toward defined objectives
- **Habit Consistency Metrics:** Detailed completion statistics
- **Trend Identification:** Recognition of emerging patterns
- **Success Factor Analysis:** Conditions associated with high performance
- **Challenge Documentation:** Areas of struggle with context
- **Predictive Insights:** Projected outcomes based on current trajectories
- **Habit Correlation:** Relationships between different tracked behaviors
- **Milestone Timeline:** Chronological view of significant achievements
- **Shareable Summaries:** Export options for accountability or record-keeping

46. Achievement and Milestone Celebration

Meaningful recognition of progress to reinforce motivation:

- **Achievement Detection:** Automatic identification of significant accomplishments
- **Celebration Prompts:** Suggestions for meaningful ways to acknowledge progress
- **Visual Rewards:** Digital badges, certificates, or visualizations
- **Milestone Showcase:** Gallery of completed achievements
- **Progress Path:** Visual journey showing advancement over time
- **Custom Celebration Definition:** User-defined meaningful rewards
- **Share Options:** Selective sharing of achievements with support network
- **Surprise Elements:** Occasional unexpected recognition to maintain delight
- **Achievement Categories:** Organization by life area or goal type
- **Streak Celebrations:** Special recognition for consistency milestones
- **Personal Records:** Tracking and celebration of best performances
- **Reflection Prompts:** Questions to enhance the meaning of achievements

47. Dark/Light Mode Themes

Visual theme options for different preferences and conditions:

- **Automatic Switching:** Time or light-based automatic theme changing
- **Manual Override:** User control regardless of system settings
- **True Black Option:** Battery-saving mode for OLED screens
- **Color Customization:** Accent color selection within themes
- **Preview Function:** See theme appearance before applying
- **Per-screen Settings:** Different themes for different app sections
- **Scheduled Themes:** Time-based theme switching (e.g., evening reading mode)
- **Reading Optimization:** Special themes for journal and content consumption
- **Contrast Settings:** Accessibility adjustments within each theme
- **Theme Import/Export:** Share or save custom theme configurations
- **Weather Integration:** Optional theme adaptation based on local conditions
- **Seasonal Variations:** Special theme options during holidays or seasons

48. Personalization Options

Comprehensive system allowing users to tailor the app experience to their preferences and needs:

- **AI Assistant Personality:** Adjust the tone, formality, and communication style of the AI (supportive, direct, analytical, friendly)
- **Notification Preferences:** Granular control over notification types, frequency, timing, and style
- **Visual Themes:** Custom color schemes beyond basic light/dark mode, including focus colors and emphasis options
- **Dashboard Widget Configuration:** Control which widgets appear and their arrangement on the home screen
- **Habit Tracking Visualization:** Choose preferred visualization styles for tracking (calendar view, streak counters, graphs)
- **Language Settings:** Select preferred language and terminology (e.g., "tasks" vs "to-dos")
- **Time Format Preferences:** 12/24 hour clock, week start day, calendar view options
- **Goal Tracking Style:** Choose between different visualization methods for goal progress
- **Reminder Intensity:** Control how persistent reminders are (gentle nudges vs. stronger prompts)
- **Feedback Style:** Set how the app provides feedback on habit completion (minimal, encouraging, detailed)
- **Accessibility Options:** Text size, contrast settings, screen reader optimization, reduced motion
- **Focus Mode Settings:** Customize what appears during focused work periods

- **Default Views:** Set which sections of the app appear first when opening
- **Journaling Prompts:** Personalize the types of prompts suggested for reflection
- **Sound & Haptic Feedback:** Customize interaction sounds and haptic feedback patterns
- **Import/Export Settings:** Save personalization profiles and transfer between devices
